

CONTENTS

- 1 *Overview* Magnesium alloys and applications
I. J. Polmear
- 17 Effect of lamellar spacing on deformation behaviour of unidirectionally solidified, twin phase TiAl
G. H. Fair, J. V. Wood, T. Nakano, and Y. Umakoshi
- 22 Cohesion in titanium carbide
A. H. Cottrell
- 27 Secondary ion mass spectrometry and scanning electron microscopy analysis of grain boundary oxides in 9Cr-1Mo steel and influence of grain size on scale spalling
R. K. Singh Raman and A. K. Tyagi
- 35 Austempering of low manganese ductile irons
Part 4 Relationship between mechanical properties and microstructure
A. S. Hamid Ali, K. I. Uzlov, N. Darwish, and R. Elliott
- 41 Ultrafine microstructures developed during torsional testing of Hadfield manganese steels
A. Goldberg, T. Oyama, O. A. Ruano, and O. D. Sherby
- 52 Effect of cobalt on impact toughness of steels
D. R. Squires and E. A. Wilson
- 56 Microstructures in hot wire laser beam welding of HY 80 steel
E. A. Metzbower, H. K. D. H. Bhadeshia, and R. H. Phillips
- 60 Titanium aluminide composites produced by laser melting
J. H. Abboud and D. R. F. West
- 69 Predicting case depth in tempered steels hardened via laser processing
M. Y. Wei and C. Chen
- 75 Prediction of tensile properties of intercritical heat affected zone
O. M. Akselsen, G. Rørvik, and A. O. Kluken
- 89 Influence of microalloying additions on thickness of grain boundary carbides in ferrite-pearlite steels
B. Mintz, S. Tajik, and R. Vipond
- 97 Austenite reversion in cold formed 18 wt-%Ni 350 grade maraging steel
A. Ali, M. Ahmed, F. H. Hashmi, and A. Q. Khan
- 102 Secondary recrystallisation of two oxide dispersion strengthened ferritic superalloys: MA 956 and MA 957
M. A. Miodownik, J. W. Martin, and E. A. Little
- 110 Transformation kinetics of ferrous weld metals
G. Thewlis
- 126 Oxidation induced lifetime limits of thin walled, iron based, alumina forming, oxide dispersion strengthened alloy components
W. J. Quadakkers and M. J. Bennett
- 132 Influence of interface properties on mechanical behaviour of particle reinforced metal matrix composite
M. Vedani, E. Gariboldi, G. Silva, and C. Di Gregorio
- 141 Hydrogen crack initiation and propagation in pure iron single crystal
S. Hinotani, Y. Ohmori, and F. Terasaki
- 149 Effect of rolling geometry and surface friction on cube texture formation
C. S. Lee, R. E. Smallman, and B. J. Duggan
- 155 Modified theory of rolling texture development in α brass
C. S. Lee and B. J. Duggan
- 162 Effect of zirconium and magnesium additions on properties of Al-Li based alloy
S. Kumar, H. B. McShane, and T. Sheppard
- 177 *Overview* Chemical vapour deposited diamond fibres: manufacture and potential properties
P. G. Partridge, P. W. May, and M. N. R. Ashfold
- 190 Young's modulus for carbides of 3d elements (with particular reference to Fe₃C)
A. P. Miodownik
- 193 Changes in chemical composition of carbides in 2.25Cr-1Mo power plant steel
Part 1 Bainitic microstructure
R. C. Thomson and H. K. D. H. Bhadeshia
- 205 Changes in chemical composition of carbides in 2.25Cr-1Mo power plant steel
Part 2 Mixed microstructure
R. C. Thomson and H. K. D. H. Bhadeshia

- 209 **Strength of mixtures of bainite and martensite**
C. H. Young and H. K. D. H. Bhadeshia
- 215 **Microstructure and texture evolution in continuously cooled AA 3004 hot rolled sheet**
R. G. Kamat and S. Saimoto
- 222 **Precipitation of metastable δ' in Al-1.9Li-2.5Mg alloy**
H. Tsubakino, R. Nozato, T. Sakurai, Y. Hasegawa, and Y. Hayashi
- 227 **Determination of hardness distribution in rods after combined rolling and drawing deformations**
A. Grabianowski, J. Kloch, and B. Ortner
- 231 **Modelling of stretch forming behaviour in steel strip using finite element method**
J. Y. Xia and D. T. Llewellyn
- 239 **Effects of heat treatment on microstructure and mechanical properties of Cr-Mo-3.5Ni-V steel**
N. Ridley, S. Maropoulos, and J. D. H. Paul
- 250 **Evaluation of laser treated copper alloys**
C. V. Hyatt, T. Betancourt, and K. Mackay
- 257 **Temperature dependence of modulus in particle reinforced composites**
D. J. Lloyd, H. Burke, and B. Farahbakhsh
- 265 **Combined optical-acoustic microscopy for investigating short fatigue crack propagation**
J. Z. Pan, U. S. Fernando, K. J. Miller, and E. R. de los Rios
- 272 **Partial isothermal sections of Ti-Al-V ternary diagram**
T. Ahmed and H. M. Flower
- 289 **Textures and microstructures in duplex stainless steel**
A. ul-Haq, H. Weiland, and H.-J. Bunge
- 299 **Texture and microstructure of rolled and annealed tantalum**
D. Raabe, G. Schlenkert, H. Weisshaupt, and K. Lücke
- 306 **Early stages of decomposition of ferrite in duplex stainless steel**
C. H. Shek, G. J. Shen, J. K. L. Lai, and B. J. Duggan
- 312 **Eutectic spacing selection in Al-Cu system**
A. Ourdjini, Jincheng Liu, and R. Elliott
- 319 **Preparation of copper based shape memory alloy via mechanical alloying technique**
L. Lu, M. O. Lai, and S. Zhang
- 323 **Microstructure control and extrudability of Al-Mg-Si alloys microalloyed with manganese**
S. Zajac, B. Hutchinson, A. Johansson, and L.-O. Gullman
- 334 **Interpretation of cleavage resistance of modern high strength structural steels**
P. Brozzo, M. Capurro, and E. Stagno
- 340 **Physical significance and reliability of Larson-Miller and Manson-Haferd parameters**
E. Pink
- 353 **Thermodynamics of acicular ferrite nucleation**
G. I. Rees and H. K. D. H. Bhadeshia
- 359 **Secondary ion mass spectrometry and multireflection infrared analyses of conversion coatings on Fe-Cr-Al stainless steels for catalysis: study of thermal stability**
L. Aries and J. Roy
- 364 **Void formation in wide gap brazing using prepacks of nickel base braze mixes**
S. K. Tung and L. C. Lim
- 370 **Optimisation of hot rolling schedule for direct charging of thin slabs of Nb-V microalloyed steel**
N. Zentara and R. Kaspar
- 377 **Processing map for hot working of Ni-16Cr-8Fe alloy (IN 600)**
N. Srinivasan and Y. V. R. K. Prasad
- 384 **Residual stresses in spring steel round rods subjected to two separate manufacturing processes**
M. Kovač
- 389 **Effect of liquid gallium on fatigue crack propagation in brass**
R. E. Clegg and D. R. H. Jones
- 397 **Preparation of amorphous alloys in Zr-Mo-Pd system**
D. Guskovic and Z. D. Stankovic
- 399 **Temperature dependence of interfacial shear strength in SCS-6 fibre reinforced Ti-24Al-11Nb metal matrix composites**
M. Guermazi
- 406 **Accelerated aging processes in ceramic reinforced AA 6061 composites**
Y. Song and T. N. Baker

- 414 **Functionally gradient layers of Ti-Al based alloys produced by laser alloying and cladding**
J. H. Abboud, R. D. Rawlings, and D. R. F. West
- 421 **Microstructural characteristics of isothermal forging in cast Ti-6Al-4V/TiC composites**
D. Hu, T. P. Johnson, and M. H. Loretto
- 425 **Three dimensional numerical model for laser transformation hardening of metals**
Bing-Wu Gu, Tian-Chi Ma, S. K. Brown, and L. Mannik
- 431 **Short Communication Effective stress-strain response of ausformed AISI 9310 steel carburised to 1%C**
T. B. Olson, C. M. Paliani, M. F. Amateau, and R. A. Queeney

Papers from conference 'Metal matrix composites 4: design and innovation'

- 441 **Editorial**
 - 443 **Design with metal matrix composites**
H. R. Shercliff and M. F. Ashby
 - 452 **Poster paper Design aspects of processing of aluminium 6061 based metal matrix composites via powder metallurgy**
Xiaomin Ni, M. S. Maclean, and T. N. Baker
 - 460 **Reference stress approach for predicting creep deformation of metal matrix composites**
T. H. Hyde, P. K. Y. Ling, and N. A. Warrior
 - 468 **Effect of test conditions on cavitation and failure during tensile loading of discontinuous metal matrix composites**
A. F. Whitehouse and T. W. Clyne
 - 475 **Effect of microstructure on mechanical properties of thermomechanically processed 2124-SiC_p metal matrix composite**
C. M. Styles, I. Sinclair, P. J. Gregson, and S. M. Flitcroft
 - 481 **Poster paper Discontinuously reinforced aluminium composites sliding against steel: study on wear behaviour**
F. Bonollo, L. Ceschini, G. L. Garagnani, G. Palombarini, and A. Zambon
 - 487 **Poster paper Hot deformation, dynamic recovery, and recrystallisation behaviour of aluminium 6061-SiC_p composite**
Xiaoxin Xia, P. Sakaris, and H. J. McQueen
 - 497 **Poster paper Microstructural and mechanical characterisation of aluminium matrix composites reinforced with Ni and NiP coated SiC particles via liquid processing**
P. Trespaillé-Barrau and M. Suéry
 - 505 **Potential for diamond fibres and diamond fibre composites**
P. G. Partridge, P. W. May, C. A. Rego, and M. N. R. Ashfold
 - 513 **Tribological properties of metal matrix composites**
I. M. Hutchings
 - 518 **Optimisation of alloy-alumina fibre combination for magnesium based metal matrix composites**
F. U. Rehman, H. M. Flower, and D. R. F. West
 - 526 **Assessment of overload profiles and interfacial shear strength in unidirectional fibre composites via quantitative fractography**
M. Lienkamp and H. E. Exner
 - 531 **Advanced composite metallic laminates**
P. G. Partridge, I. Farrow, and D. J. Smith
 - 536 **Design of surface *in situ* metal-ceramic composite formation via laser treatment**
T. N. Baker, H. Xin, C. Hu, and S. Mridha
 - 545 **Fluidity of aluminium alloy AlSi7Mg-SiC particulate composite melts**
A. Kolsgaard and S. Brusethaug
 - 552 **Adhesion of SM1140+ coatings to silicon carbide substrate in Sigma monofilament**
R. A. Shatwell
 - 558 **Diametral compression testing of metal matrix composites**
F. Bonollo, B. Molinas, I. Tangerini, and A. Zambon
 - 565 **Impact and chevron notch fracture toughness testing of particulate metal matrix composites**
R. M. Boothby and C. A. Hippsley
 - 572 **Poster paper Assessment of diffusion barriers for Ti-SiC composites**
J. R. Nicholls, N.-C. Shih, and D. J. Stephenson
-

- 581 Texture gradient, average texture, and plastic anisotropy in various Al-Li sheet alloys
Xiaohu Zeng, M. Ahmad, and O. Engler
- 592 Secondary ion mass spectrometry and scanning electron microscopy characterisation of grain boundary oxide ridges in 9Cr-1Mo steels having different silicon contents, and influence of grain size on scale spalling
R. K. Singh Raman, A. K. Tyagi, K. Krishan, and J. B. Gnanamoorthy
- 599 Precipitation behaviour of 7000 alloys during retrogression and reaging treatment
M. Kanno, I. Araki, and Q. Cui
- 604 Influence of aluminium and thermomechanical treatment on formability and mechanical properties of type 430 stainless steel
R. Paton
- 614 Influence of martensite formation and grain size on room temperature low cycle fatigue behaviour of AISI 304LN austenitic stainless steel
S. Ganesh Sundara Raman and K. A. Padmanabhan
- 621 Retained austenite in low carbon, manganese steel after intercritical heat treatment
H. Huang, O. Matsumura, and T. Furukawa
- 627 Bauschinger and yield effects during cyclic loading of high temperature alloys at 550°C
R. P. Skelton
- 640 Low cycle fatigue and fracture behaviour of cast Cu-Pb alloys
T. S. Srivatsan, S. Anand, and T. S. Sudarshan
- 647 Characterisation of electron beam welding of superplastic formed 8090 Al-Li alloys
J. C. Huang, Y. D. Shen, and N. J. Ho
- 659 Structure and properties of functionally gradient aluminium alloy 2124/SiC composites
C.-Y. Lin, H. B. McShane, and R. D. Rawlings
- 669 Electronic contribution to superplasticity in ceramics
T. J. Davies and A. A. Ogbu
- 674 Liquidus projection of Ti-Al-Si ternary system in vicinity of γ alloys
S. H. Manesh and H. M. Flower
- 681 Liquidus projection of Ti-Al-V system based on arc melted and cast microstructures
T. Ahmed, H. J. Rack, and H. M. Flower
- 691 Vertical section of Fe-C-2Si-2Mn-1Cr system for carbon contents up to 0.8 wt-% and associated phase compositions
M. Svoboda, A. Kroupa, and L. Karmazin
- 696 Effects of residual porosity on strength of Sn-Pb/Cu₆Sn₅ particulate composites
R. B. Clough, A. J. Shapiro, and G. K. Lucey, Jr
- 703 Development of microstructures of high grain aspect ratio during zone annealing of oxide dispersion strengthened superalloys
M. Mujahid and J. W. Martin
- 711 Microstructure and fracture of aluminium austempered ductile iron investigated using electron microscopy
L. Sidjanin, R. E. Smallman, and S. M. Boutorabi
- 721 Influence of strain rate on production of deformation induced ferrite and hot ductility of steels
B. Mintz and J. J. Jonas
- 728 Influence of heat treatments on microstructure of austempered ductile iron
J. Aranzabal, I. Gutierrez, and J. J. Urcola
- 738 Participation of hydrogen in slow bending behaviour of 304L stainless steel
J. B. Terrell, D. P. Harvey II, T. S. Sudarshan, and M. R. Louthan, Jr
- 741 Natural convection in aluminium direct chill cast ingot
S. C. Flood and P. A. Davidson
- 757 Effect of modification on aluminium matrix of Al-Si-Mg alloys
F. Paray and J. E. Gruzleski
- 763 Effect of zinc and silicon additions on structure and properties of rapidly solidified Mg-Al alloys
A. Garboggini and H. B. McShane
- 771 Effect of pretreatment and texture on recovery and recrystallisation in Al-4.5Mg-0.7Mn alloy
O. Engler, I. Heckelmann, T. Rickert, J. Hirsch, and K. Lücke
- 783 Fabrication of alumina short fibre reinforced aluminium alloy via centrifugal force infiltration
J.-Q. Jiang, A.-B. Ma, H.-N. Liu, and R.-S. Tan

- 788 Transition metal carbides with NaCl structure
A. H. Cottrell
- 793 Two dimensional probabilistic model of evolution of dendritic grain structures in undercooled melts
S. G. R. Brown and J. A. Spittle
- 797 As received Ti-6Al-4V/ σ -SiC fibre composite
D. Upadhyaya, R. Brydson, C. M. Ward-Close, P. Tsakiroopoulos, and F. H. Froes
- 807 Transient liquid phase diffusion bonding of continuous SiC fibre reinforced Ti-6Al-4V composite to Ti-6Al-4V alloy
S. Fukumoto, A. Kasahara, A. Hirose, and K. F. Kobayashi
- 813 Intergranular fracture in cleavage fracture temperature range
K. Abbott, R. Moskovic, and P. E. J. Flewitt
- 817 Surface cracking and phase transformations associated with cathodic charging of austenitic stainless steel
D. Hardie and W. Zheng
- 823 Weldability and properties of martensitic/austenitic stainless steel joints
Z. Sun and H.-Y. Han
- 830 Confirming mathematical metalworking models by comparison with microstructures
A. Greasley and H. Shi
- 837 Modelling of and solidification behaviour during laser surface alloying of ferrous alloys with CrB₂
G. Shafirstein, S. Ariely, M. Bamberger, F. Maisenhlder, and M. Langohr
- 845 *Short Communication* Development of foil metallurgy technique for production of TiAl
A. Jakob and M. O. Speidel
- 848 Microstructure and properties of laser produced Ti-Al functionally gradient clad
J. H. Abboud, D. R. F. West, and R.D. Rawlings
- 855 Computer simulation of recrystallisation and grain growth
D. G. Martin
- 862 Deformation banding and formation of cube volumes in cold rolled fcc metals
C. S. Lee, R. E. Smallman, and B. J. Duggan
- 869 Mechanism of nucleation and precipitation in 6061-Li alloys
Z. W. Huang, M. H. Loretto, R. E. Smallman, and J. White
- 879 Morphological and kinetic aspects of thermal oxidation of SiC whisker reinforced Al₂O₃
Wang Deqing and H. F. Lopez
- 887 Effect of fibre surface morphology on stability of C/TiB_x coatings in Ti-6Al-4V/ σ (SM1240) fibre metal matrix composite
D. Upadhyaya, C. M. Ward-Close, P. Tsakiroopoulos, and F. H. Froes
- 894 Compressive behaviour of partially remelted A356 alloys reinforced with SiC particles
L. Nguyen Thanh and M. Sury
- 903 Impact deformation and work hardening of high manganese steels containing NbC particles
D. Zhang, A. J. Baker, and P. R. Beeley
- 908 Influence of microstructure on hydrogen embrittlement behaviour of 2-25Cr-1Mo steel
R. Valentini and A. Solina
- 915 Effect of thermal cycling on creep behaviour of 2-25Cr-1Mo/type 316 steel dissimilar metal welds
J. A. Williams and J. D. Parker
- 924 Effect of iron additions on microstructure and mechanical properties of Ni-Cr-Mo-Si hardfacing alloy
S. E. Mason and R. D. Rawlings
- 933 Effects of rare earth metals on electrical conductivity and mechanical properties of commercial purity aluminium
F. Pan, D. V. Edmonds, S. Zhou, and P. Ding
- 936 Performance enhancement of Inconel alloy X-750 during creep via optimal solution treatment and control of morphology of grain boundary carbide
M. C. Pandey, D. V. V. Satyanarayana, and D. M. R. Taplin
- 941 Control of γ' morphology in nickel base superalloys through alloy design and densification processing under electric field
S. Ahmed and E. C. McKannan
- 947 Thermomechanical relaxation of residual stress in shot peened nickel base superalloy
W. Cao, M. Khadhraoui, B. Brenier, J. Y. Gudou, and L. Castex
- 955 Effects of vanadium addition on nucleation and growth of pearlite in high carbon steel
K. Han, T. D. Mottishaw, G. D. W. Smith, and D. V. Edmonds

- 964 Effects of carbon content on mechanical properties of 5%Mn steels exhibiting transformation induced plasticity
T. Furukawa, H. Huang, and O. Matsumura
- 971 Crack initiation during wire drawing of low carbon, manganese steel wire rods containing ferrite, pearlite, and martensite
C. M. Bae and W. J. Nam
- 977 Solidification and microstructure of eutectic Pb-Sn microsoldier bonds
N. R. Green, J. A. Charles, and G. C. Smith
- 981 Parametric study of parallel heat welding process via finite element simulation
Y. V. L. N. Murthy, G. Venkata Rao, and P. Krishna Iyer
- 986 Modelling of temperature losses in liquid metal during casting formation in expendable pattern casting process
S. Shivkumar
- 993 Nimonic compound exhaust valve spindles for diesel engines via hot isostatic pressing
T. Moriyama, Y. Izaki, K. Umeda, R. Oka, Y. Nishioka, and T. Tanaka
- 1002 Coatings and hardfacing alloys for corrosion and wear resistance in diesel engines
J. R. Nicholls
- 1013 Application and optimisation of materials in valve train
U. Todsen
- 1021 Observation of $\beta \rightarrow \omega$ transformation at room temperature in rapidly solidified Ti-7.5Mn-0.5B alloy using transmission electron microscopy
Z. Fan
- 1026 Bonding configurational changes associated with α ferrite/ γ austenite phase stability in steels due to transition metal alloy elements
A. A. Ogwu and T. J. Davies
- 1031 Effect of beryllium on age hardening, defect structure, and S' formation in Al-2.5Cu-1.2Mg alloy
W. V. Youdelis and W. Fang
- 1044 Ductility and fracture of copper bicrystals with boundary SiO₂ particles
H. Miura, T. Sakai, and M. Kato
- 1050 Isothermal transformation diagrams for alloyed ductile cast iron
M. Bahmani and R. Elliott
- 1057 Effect of rare earth elements on microstructure and properties of high chromium white iron
M. Radulovic, M. Fiset, and K. Peev
- 1063 Hot extrusion of 70Cu-30Ni-Fe alloy
A. K. Gupta, R. K. Goswami, and R. Sikand
- 1068 Effects of pearlite formation on mechanical properties of austempered ductile iron
M. Bahmani and R. Elliott
- 1073 Microstructure and fracture toughness of N26MT2Nb steel after selected heat treatments
J. Jelenkowsky
- 1084 Fabrication and diffusion analysis of nitrided austenitic steel laminates
R. F. Irwin and A. Hendry
- 1090 High temperature corrosion and carbon deposition phenomena on stainless steels
T. I. Barry and A. T. Dinsdale
- 1096 Effect of high temperature aging on ferrite transformation kinetics and tensile properties of type 316L stainless steel weld metal
H. Shaikh, M. G. Pujar, N. Sivaibarasi, P. V. Sivaprasad, and H. S. Khatak
- 1104 Influence of stress on microstructural stability of type 316 stainless steel weld metal
M. D. Mathew, G. Sasikala, T. P. S. Gill, S. L. Mannan, and P. Rodriguez
